2873

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hou(U.S. Pat. NO. 6,113,810) in view of Liang(U.S. Pat. NO. 2004/0263946).

Regarding claim 11, 12, Hou discloses an image display panel(fig 1, 10), in which two or more groups of particles having different colors and different charge characteristics are sealed between opposed two substrates(fig 1, 22, 24), at least one of two substrates being transparent(col 3, lines 13-25), and, in which the particles, to which an electrostatic field produced by a pair of electrodes arranged on one substrate or both substrates is applied(fig 1, 18, 20), are made to move so as to display an image(col 3, lines 39-45). Hou does not disclose that two substrates of the image display panel are connected by using an adhesive, in fact Hou does not disclose how the two substrates are connected. However, Liang et al. discloses using a thermosetting adhesive or a photo-curing adhesive made from an acrylic for connecting the two substrates of the image display panel(para

0067). It would have been obvious to one skilled in the art at the time of the invention to use a thermosetting adhesive or a photo-curing adhesive made from an acrylic for connecting the two substrates of the image display panel as shown by Liang et al., with the electrophoretic device of Hou, since as shown by Liang et al. a photo-curing adhesive made from an acrylic for connecting two substrates is commonly used in electrophoretic devices for building displays.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy J. Thompson whose telephone number is (571) 272-2342. The examiner can normally be reached on 8:30 AM - 6:00 Pm.
